

SPINDLE FULL-SERVICE

We repair and optimize motor and belt driven spindles of all manufacturers and brands. With regard to specific operating conditions in the machine and the resulting failure reasons, we significantly improve spindle lifetime. The result: a completely new spindle, significantly lower failure rates for a fraction of the cost of a new or replacement spindle from the manufacturer.

✓ 800 repairs per year

Spindle repair

Holistic repair, optimization and modification of spindles.

✓ 2000 + customer

Spindle installation and removal
